MINI FORM CONSTRUCTION TIPS

MagicStripTM Installation

molded lines between each strip.

Foil Wrapping Small Pieces

When foiling small pieces such as flower centers, flower petals, and leaves, it is best to overlap foil on glass approximately 1/64"; wider foil will cover too much of the glass. The exception is of small pieces at the top of the lamp. These pieces should be a small pieces of the lamp.

the lamp. These pieces should be wrapped with at least a 1/32" overlap. Increasing the size of the overlap adds strength to the lamp. If you have foil that is too wide, it can be easily trimmed with scissors,

Leave the paper backing in place while trimming. the untrimmed edge is placed on the outside for nice even seams.

Reinforce_Top

Remove the lamp from the form. To reinforce the

Wear heavy leather gloves

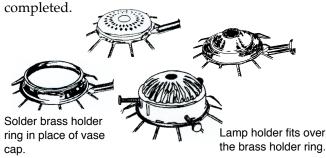

aperture opening solder a loop of copper wire inside. Use size 14, 12, or 10 gauge, cover with solder. Use leather gloves to hold wire.

<u>Vase Cap Tips</u>

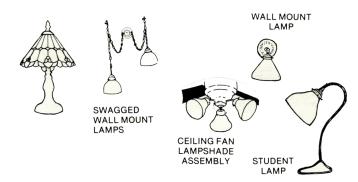

Center, level and tack solder the vase cap in the aperture opening, and firmly attach with solder seam. Wash and rinse thoroughly. Apply antiquing after vase cap has been installed and all soldering completed

Reinforce Bottom

To reinforce the bottom edge bend and solder on short pieces of copper wire, cover same gauge wire as at top. Braided wire can also be used; especially around uneven bottom borders.
